

Harnessing the Power of Google Data Studio In Education November Workshop

Course Description: Do you use Excel or Google Sheets to organize and analyze data, but are looking for something more interactive and visual? Data Studio is Google's free data visualization tool that allows you to turn unwieldy spreadsheets into visual dashboards that bring your data to life. Whether it's assessments, demographics, behavior, or attendance data, if it's in a spreadsheet, you can visualize it with Google Data Studio! This workshop will provide participants with an understanding of the potential for using Google Data Studio with education data and an opportunity to engage with Data Studio tools and features. Participants will learn basic Data Studio skills using a sample data set, but will have time to work with their own data as well.

Participants should have at least intermediate spreadsheet skills and be comfortable working with data and the Google suite of tools.

Participants should bring a laptop or Chromebook and have access to a Google account.

MA Educator Evaluation Strand and Indicator addressed by this workshop: **Teacher Indicator I-C:** Analyzes data from assessments, draws conclusions, and shares them appropriately. **School Level Administrator Indicator I-E:** Uses multiple sources of evidence related to student learning, including state, district, and school assessment results and growth data, to inform school and district goals and improve organizational performance, educator effectiveness, and student learning.

About the Instructor: **Laura Tilton** has worked for 20+ years supporting school districts as they use technology and data to improve teaching and learning. As Regional Data Specialist for the MA-DESE Southeast DSAC, she focused on helping districts use and understand MCAS and accountability data. She also was an Assoc. Director at FreshPond Education and Director of Curriculum, Instruction & Technology in Carver Public Schools. Currently she is the Director of District Data and Accountability for Marshfield Public Schools.
