

Teach Professional Development at TEC this Summer

**Would you like to teach a graduate level course for colleagues?
Share your passion & expertise by teaching courses this summer
through TEC!**

TEC invites interested teachers to create and teach courses throughout the summer. Traditional face-to-face courses will still be offered but we are planning to increase the menu of hybrid/online courses to accommodate teachers' varied summer schedules and desires to teach and participate in online professional development.

To learn more about teaching at TEC in summer 2019 click [Overview](#).

To tell us about a course you would like to teach in summer 2019 click [Course Proposal](#).

Because we know that teaching online is different from teaching face-to-face and because we want to encourage teachers to develop online courses, we are offering a two-credit graduate course, beginning in February 2019, to support instructors' efforts to teach online. Learn how to teach online and learn the perks we are able to offer for creating and teaching an online course this summer.

For more information about this course click [Course Design Support](#).
