The FDA has issued an alert regarding malfunction of epinephrine auto-injectors

Please visit the following link for more information

Childhood Trauma

- Trauma is deeply distressing or disturbing experience
- Some signs and behaviors that a child might exhibit after a traumatic event include:
  - Easily startled
  - Self harm
  - Sleeping troubles
  - Worry, panic
  - Losing interest in their friends and activities
  - Physical symptoms (headache, stomach upset)
  - Trouble concentrating
  - Avoiding places or people
  - Acting younger than their age
  - Self harm
  - Restlessness, irritability
  - Problems in school
- With support people can heal
  - Find your child professional support with a trained specialist.
  - Get support for yourself. The following resource is available for parents and caregivers. Resources for Parents and caregivers on understanding trauma
  - Virtual Calming Room is another great resource to help deal with challenges brought upon by stress/trauma.

Skin Care Awareness

- 1 in 5 people in the U.S. will develop skin cancer by age 70
- More than 2 Americans die of skin cancer every hour
- 5 or more sunburns increases your risk for melanoma
- Early detection increases the five year survival rate for melanoma to 99%
- For information on skin cancer prevention, risk factors, early detection, treatments, and resources, visit the Skin Cancer Foundation: https://www.skincancer.org/
- To learn how to detect skin cancer and how to perform a self exam, visit the American Academy of Dermatology Association: https://www.aad.org/public/diseases/skin-cancer/find/check-skin
- Utilize the mole map to detect skin cancer: Skin mole map/assets.ctfassets.net/1ny4yoiyrgia/bwNdpZvXXhBc1sutZyaLno/bf4391b9a27521dc3479c564178bfffa/body-mole-map.pdf

Joke of The Week

Brought to you by Joey

Joey’s Joke

Looking for students to volunteer for joke of the week. If interested please email one of our nurses. Emails are on 2nd page of newsletter.
**Constipation**

- Constipation is a common problem in children. It's one of the main reasons children are referred to a specialist, called a **pediatric gastroenterologist**.
- Constipation can be caused by underlying medical conditions, diet, illness, withholding and other changes such as stress, travel, and changes in routines.
- Symptoms include: Having lumpy, hard, dry stool, difficulty passing stools, Pain or bloating in the abdomen, reduced appetite, sluggishness or lethargy.
- Treatment /therapy is based on the cause of the constipation. Treatment may include foods high in fiber, increasing water intake, non-stimulant laxatives, stimulant laxatives, enemas, suppositories, biofeedback training, prescription medications, and surgery.
- You should contact your MD to discuss causes and come up with an individualized treatment plan to treat constipation for you or your child.

For more information on constipation visit [GI kids](#)
